

CCI QUALITY ASSURANCE

cGMP CAPABILITIES

Our cGMP compliant process begins with a focus on purity, cleanliness, and consistent quality. From the audits we conduct with our key supply partners, to the process control steps implemented, to the testing and verification we conduct in our lab; let our 35+ year track record of supplying high purity products serve your needs.

We have been successfully audited by and currently supply Fortune 500 companies in diverse industries including pharmaceutical, medical device, food, and semi-conductor.

UNDERSTANDING OUR CUSTOMERS' NEEDS

Expanding expectations from today's society demand ever increasing product purity, cleanliness, consistency, and traceability. CCI has partnered with our customers to gain a strong understanding of the need for transparency, rigorous quality assurance programs, and the need to continually improve and invest to ensure we deliver high quality products both now and into the future.

cGMP MANUFACTURING CAPABILITY

- CCI is compliant with 21 CFR part 210, 211, and 820
- FDA registered
- Custom packaging of solids and liquids
- Certified clean rooms
- Custom blended solutions
- Multi-compendia experience including USP, NF, FCC, EP, JP & BP grades

OUR COMMITMENT TO YOU

Columbus Chemical Industries has developed and implemented a Quality Management System designed to continually improve the effectiveness and efficiency of the organization's performance by considering the needs of all interested parties (customers, shareholders, suppliers, employees, and society). This program is implemented at all of our manufacturing locations. The Quality Management System complies with the ISO 9001:2008 international standards and is certified by NQA.

TECHNICAL CAPABILITIES

CCI is committed to providing the highest quality chemicals to our customers and our testing capabilities listed below are a testament to that commitment.

- Trace metal testing to the sub PPB levels utilizing our on-site inductively coupled plasma mass spectrophotometer
- Ultraviolet-visible spectroscopy
- Bench chemical analysis
- DNASE/RNASE detection
- Microbiological counts
- Particle counts
- pH analysis
- Spectrophotometer
- Gravimetric
- Conductivity

Contact us for additional capabilities as we are continually expanding our offerings to meet the needs of our customers and the markets we serve.
